DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 2, 2009 has been entered.

2. Claims 1-3 and 5-8 are pending. Claim 4 is cancelled. Claim 3 has been amended.

3. Claims 1-3 and 5-8 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Choi et al. (Coloration Technology (2001), 117(3), pp. 127-133) in view of Hoppe et al. (US Patent 5,160,348) for the reasons set forth in the previous office action.

Response to Arguments

4. Applicant's arguments filed regarding Choi et al in view of Hoppe et al. have been fully considered but they are not persuasive. The examiner argues that both Choi et al. and Hoppe et al. are directed towards dyeing polyester and cellulose ester blends, wherein Choi et al. further disclose cellulose acetate. Both references are directed

Art Unit: 1796

towards dyeing these textiles with the benefits of superior wetfastness. While neither reference alone teaches the combination of the two claimed dyes, Choi et al. teach dyes of instantly claimed formula (2') and Hoppe et al. teach dyes of instantly claimed (1'). It would have been obvious to combine the two dyes in a single dye mixture because both references teach the utility of each dye as effective in coloring similar fabrics (cellulose esters or diacetate and polyester) for similar benefits (superior wetfastness) and the dyes utility when used in a dye mixture. It is *prima facie* obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to be used for the very same purpose, see *In re Kerkhoven*, 626 F.2d 846,850,205 USPQ 1069, 1072 (CCPA 1980).
